City & Guilds Award in Control Entry and Arrangements for Confined Spaces (High Risk)

This is a Level 3 Qualification

This course is designed for.

This unit is for the entry controller/top person who controls entry and arrangements for high risk confined spaces without entering them. It includes the duties of an entry controller, pre-entry procedures, entry into and exit from the high risk confined space, maintaining communications and initiating and controlling emergency procedures.

Prerequisite for course

The candidate is required to take part in both practical and theory-based training. This will involve using WAH equipment and being suspended and lowered via a tripod and winch system. There will also be a requirement to enter a confined space training resource that will involve crawling on hands and knees.

Aim

The aim of this unit is to reflect the national occupational standard for controlling entry and arrangements at a confined space. This unit covers both water and non-water industry areas.

Water: this may include working with potable water, sewage treatment processes, drain and sewer cleaning operations, or where the operative is working in or near water, or where a confined space is subject to surface water flooding.

Non-water: this may include pharmaceutical, petrochemical, asbestos removal, vehicle manufacture and servicing, aeronautical, construction, communications, power, utilities gas, electrical and mechanical engineering and some elements of work operations in mines, quarries and tunnelling.

Learning Outcomes

The learner Will

- implement procedures for teams working in high risk confined spaces.
- control safe entry and exit to the high risk confined space.
- monitor the work team to ensure procedures are followed.
- control emergency situations.
- understand health and safety and environmental legislation.
- understand standard protocols for work in high risk confined spaces.

- understand entry controller duties and responsibilities.
- understand equipment checks and testing required.

Total Qualification time

Estimated at 24 hours of guided learning hours (3 days)

Learning environment

This is a classroom and practical based course using PowerPoint, lecture, discussion, and various online resources. There is a practical element using tools and equipment associated with medium-risk entries. Including Emergency escape sets and working at height equipment. The training will take place in a City and Guilds approved venue or mobile training facility.

Assessment method

Practical observation, short answer question paper

Compliance

- National Occupational Standards for Working in Confined Spaces – EUSCS04
- Confined space regulations

Student resource requirements

It is recommended that students attend with a laptop or have the ability to make notes. An electronic Confined space handout will be shared during the course. PPE will be required for this course including safety boots, gloves, helmet, and appropriate workwear. Arms and legs will need to be covered.

The qualification is valid 3 years from date of completion.
