

# City and Guilds 6160-03

## City & Guilds Award in Working in High Risk Confined Spaces

### This is a Level 2 Qualification

**This course is designed for.**

This unit is for those working in a high risk environment and includes preparing to work safely, entering and exiting high risk confined spaces safely, using equipment and tools safely, following procedures and dealing with emergencies.

### Prerequisite for course

Candidate fitness - The candidate is required to take part in both practical and theory-based training. This will involve using WAH equipment and being suspended and lowered via a tripod and winch system. There will also be a requirement to enter a confined space training resource that will involve crawling on hands and knees.

### Aim

The aim of this unit is to reflect the national occupational standard for a high risk related confined space environment. This unit covers both water and non-water industry areas.

**Water:** this may include working with potable water, sewage treatment processes, drain and sewer cleaning operations or where the operative is working in or near water or where a confined space is subject to surface water flooding.

**Non-water:** this may include pharmaceutical, petrochemical, asbestos removal, vehicle manufacture and servicing, aeronautical, construction, communications, power, utilities, gas, electrical and mechanical engineering and some elements of work operations in mines, quarries and tunnelling.

### Learning Outcomes

The learner Will

- prepare to work safely in high risk confined spaces.
- enter and exit high risk confined spaces safely.
- use equipment and tools safely.
- follow working procedures and work safely.
- deal with emergencies.
- understand the principles of working in high risk confined spaces.
- understand standard protocols for working in high risk confined spaces.

**Total Qualification time**

Estimated at 24 hours of guided learning hours (three days).

**Learning environment**

This is a classroom and practical based course using PowerPoint, lecture, discussion, and various online resources. There is a practical element using tools and equipment associated with medium-risk entries. Including Emergency escape sets and working at height equipment. The training will take place in a City and Guilds approved venue or mobile training facility.

**Assessment method**

Practical observation, short answer question paper

**Compliance**

- National Occupational Standards for Working in Confined Spaces – EUSCS03
- Confined space regulations

**Student resource requirements**

It is recommended that students attend with a laptop or have the ability to make notes. An electronic Confined space handout will be shared during the course. PPE will be required for this course including safety boots, gloves, helmet, and appropriate workwear. Arms and legs will need to be covered.

**The qualification is valid 3 years from date of completion.**
